

Rodrigo Braz

Game Programmer

Caldas da Rainha, Portugal | +351 968 011 416 | rodrigobraz.dev@gmail.com

Portfolio: braz11.github.io/Portfolio | GitHub: github.com/Braz11 | LinkedIn: linkedin.com/in/rodrigo-braz-7ab42522a

SUMMARY

Game programmer with professional Unity mobile experience and Unreal Engine 5 (C++/Blueprints) project work. At a 20-person mobile studio, built gameplay, matchmaking, scoring, and reward systems across published and prototype titles. Three-time winner of 48-hour game jams. Currently completing a Master's in Digital Games Development.

TECHNICAL SKILLS

Engines: Unity, Unreal Engine 5 (C++, Blueprints)

Languages: C#, C++

Gameplay systems: player controllers, physics-based mechanics, matchmaking, scoring and win/lose logic, reward/progression systems, UI, dialogue systems, local multiplayer

Other: Git, custom engine development (C++/OpenGL), shader basics

PROFESSIONAL EXPERIENCE

Game Programmer Intern — Volt Games (20-person mobile studio)

03/2024 – 07/2024 | Lisbon, Portugal (remote)

- Developed gameplay features and fixes across four Unity mobile titles, including three published on the App Store: Golf Stars, Sand Match, and Hex em Up!.
- Built core systems for Hoops Clash, a basketball game prototype: shot scoring and hoop validation, win/lose conditions, matchmaking flow, and animation timing.
- Implemented a timed chest reward system (Clash Royale-style progression).
- Prototyped a 3D Suika-style physics puzzle game: randomized fruit spawning, aiming and throwing, and merge logic.
- Fixed bugs and improved load times across multiple concurrent projects; completed the full assigned task backlog before the internship ended.

PROJECTS

Achroma Awakening — 3D puzzle game, Unreal Engine (C++ + Blueprints)

3-person team, 6 months | Playable: edgyppress-studio.itch.io/achroma-awakening

- Sole programmer: character movement, puzzle mechanics, UI, dialogue system, cutscenes, and water/visual shaders.

Entrudo — 2D game, Unity (C#)

3-person team | Playable: twinkle-frog-studios.itch.io/entrudo

- Sole programmer: rhythm mechanics, NPCs, dialogue and inventory systems; built procedural object-placement tooling to speed up level construction.

EvenOut Engine — 2D game engine, C++/OpenGL

Source: github.com/zenDevEleven/EvenOut-Engine-With-OpenGL

- Built a 2D engine from scratch — rendering, game loop, entity handling, gamepad input — plus a Xenon 2000-style demo game running on it.

Climb Up — Networked 2D multiplayer game, Unity (C#)

Playable: rodrigobraz.itch.io/climb-up

- Implemented the networking layer, matchmaking, server hosting, and server browser.

GAME JAMS

Three 1st-place finishes in 48-hour jams: Global Game Jam Leiria 2025 (Bubblenaut), Game Journeys 2025 (Bangeye Drumfight), Leiria Game Jam 2022 (TwoBer). Shipped local multiplayer, rhythm systems, and wave management under time pressure.

EDUCATION

Master's Degree, Digital Games Development — Polytechnic of Leiria

09/2024 – Present | Leiria, Portugal

Bachelor's Degree, Games and Multimedia — Polytechnic of Leiria

09/2021 – 06/2024 | Leiria, Portugal

LANGUAGES

Portuguese (native) • English (B2, professional working proficiency)
