

Rodrigo Braz

Software Developer — C++ / C#

Caldas da Rainha, Portugal | +351 968 011 416 | rodrigobraz.dev@gmail.com

Portfolio: braz11.github.io/Portfolio | GitHub: github.com/Braz11 | LinkedIn: linkedin.com/in/rodrigo-braz-7ab42522a

SUMMARY

Software developer focused on C++ and C#, with experience in real-time systems, custom engine development, and full-stack web applications. Shipped features in production C#/Unity codebases at a 20-person studio; personal projects include a 2D engine written in C++/OpenGL and a real-time web platform built on WebSockets and PostgreSQL. Currently completing a Master's degree in Digital Games Development.

TECHNICAL SKILLS

Languages: C++, C#, TypeScript/JavaScript, SQL; familiar with Java and Python

Systems & graphics: custom engine architecture, OpenGL, real-time simulation, game networking (client/server, matchmaking)

Web: React, Node.js, Socket.IO, REST APIs, PostgreSQL, Prisma

Tools: Git, Visual Studio, Unity, Unreal Engine 5, Railway (deployment)

PROFESSIONAL EXPERIENCE

Software Developer Intern (Game Programmer) — Volt Games (20-person mobile studio)

03/2024 – 07/2024 | Lisbon, Portugal (remote)

- Shipped features and fixes in production C#/Unity codebases across four mobile titles, three of them live on the App Store.
- Designed and implemented complete feature systems end-to-end: matchmaking flow, score validation with win/lose state logic, and a timed reward system.
- Diagnosed and fixed bugs and load-time issues across multiple concurrent projects; completed the full assigned backlog before the internship ended.

PROJECTS

EvenOut Engine — 2D game engine, C++/OpenGL

Source: github.com/zenDevEleven/EvenOut-Engine-With-OpenGL

- Designed and built an engine from scratch: rendering pipeline, game loop, entity handling, and gamepad input, with a complete demo game running on top of it.

Wedding Request DJ — Real-time song request platform for wedding DJs

React/TypeScript, Node.js, Socket.IO, PostgreSQL/Prisma | Deployed on Railway

- Built a full-stack web application where guests submit song requests that stream live to the DJ's dashboard over WebSockets.
- Integrated the Deezer API for track search and the YouTube Data API for video lookup; persisted requests and event data in PostgreSQL via Prisma.

Climb Up — Networked multiplayer game, Unity (C#)

Playable: rodrigobraz.itch.io/climb-up

- Implemented the networking layer end-to-end: client/server framework, matchmaking, server hosting, and server browser.

TrueMargin — E-commerce profit analytics dashboard

JavaScript, Chart.js

- Built a profit analytics dashboard with multi-currency support and a calendar-based daily tracker.

EDUCATION

Master's Degree, Digital Games Development — Polytechnic of Leiria

09/2024 – Present | Leiria, Portugal

Bachelor's Degree, Games and Multimedia — Polytechnic of Leiria

09/2021 – 06/2024 | Leiria, Portugal

LANGUAGES

Portuguese (native) • English (B2, professional working proficiency)
